

REGULATORY LD BLOCK

Shared local configuration

Parallel associations; no serial mediation inferred

CANDIDATE MOLECULAR READOUT

Canonical exon5-6 | AA150/151

Risk haplotype shifts local acceptor balance

Count models resolve canonical versus cryptic reads

Trait	Default	p12/10
AD	0.991	0.916
TC	0.977	0.810
LDL-C	0.959	0.700
non-HDL-C	0.960	0.705

CELL AND TISSUE CONTEXT

Isolated microglia

exact-event sQTL

Neurons / astrocytes

total-expression eQTL

BA24

Hippocampus

Putamen

Spinal cord

AD-state RNA: no uniform FDR-significant shift

EVIDENCE GRAMMAR

- Present-study association
- Cross-tissue / cell context
- Reference localization
- Published perturbation
- Prediction requiring validation

REFERENCE EC2 LOCALIZATION

AA150/151 within EC2

TSPAN14 four-pass topology

PUBLISHED FUNCTIONAL CONTEXT

rs7922621 editing: TSPAN14 regulation

Cell-surface ADAM10

Soluble TREM2

Published editing did not target the splice acceptors

EXACT-SPLICE-SPECIFIC PREDICTIONS

TSPAN14 protein-isoform composition

ADAM10 trafficking and substrate processing

Lipid-state-dependent cellular phenotypes
